Independent Auditor's Report

To the Shareholders of Odin Mining and Exploration Ltd. (An Exploration Stage Company)

We have audited the accompanying consolidated financial statements of Odin Mining and Exploration Ltd. which comprise the consolidated statements of financial position as at December 31, 2012 and 2011 and the consolidated statements of comprehensive income, shareholders' equity and cash flows for the years ended December 31, 2012 and December 31, 2011 and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Odin Mining and Exploration Ltd. as at December 31, 2012 and 2011, and the financial performance and its cash flows for the years ended December 31, 2012 and December 31, 2011 in accordance with International Financial Reporting Standards.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 2 in the consolidated financial statements, which indicates that the Company has a deficit of \$11,187,398 since inception and is expecting to incur further losses in the development of its business. These conditions, along with other matters as set forth in Note 2, indicate the existence of a material uncertainty that may cast significant doubt upon the Company's ability to continue as a going concern.

ODIN MINING AND EXPLORATION LTD.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2012 AND 2011
(Expressed in U.S. Dollars)

1. CORPORATE INFORMATION

Odin Mining and Exploration Ltd's (the "Company") business activity is the exploration and evaluation of mineral properties in Ecuador. The Company was incorporated under the Business Corporation Company Act of British Columbia on March 22, 1988. The Company is listed on the TSX-Venture Exchange, having the symbol ODN.V.

The address of the Company's registered office and principal place of business is 1500 – 1055 West Hastings Street, Vancouver, British Columbia, Canada, V6E 2E9.

2. BASIS OF PRESENTATION AND STATEMENT OF COMPLIANCE

Statement of Compliance

These consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

The consolidated financial statements were authorised for issue by the Board of Directors on April 23, 2013.

Basis of measurement

The consolidated financial statements have been prepared on a historical cost basis except for derivative liabilities measured at fair value

The consolidated financial statements are presented in United States dollars, which is also the Company's functional currency, and all values are rounded to the nearest dollar, unless otherwise indicated.

The preparation of financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies. The areas involving a higher degree of judgment of complexity, or areas where assumptions and estimates are significant to the consolidated financial statement are disclosed in Note 4.

Going Concern of Operations

These consolidated financial statements have been presented on the basis that the Company will continue as a going concern, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. Realization values may be substantially different from the carrying values shown and these financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. At December 31, 2012, the Company had not yet achieved profitable operations, has accumulated losses of \$11,187,398 since inception, and is expected to incur further operating losses in the development of its business, all of which raises significant doubt about its ability to continue as a going concern. The Company will periodically have to raise funds to continue operations and, although it has been successful in doing so in the past, there is no assurance it will be able to do so in the future.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all years presented in these consolidated financial statements, unless otherwise indicated.

a) Foreign Currency Transactions

Transactions in foreign currencies are translated to United States dollars, the functional currency of each company in the Group, as follows:

At the transaction date, each asset, liability, revenue and expense denominated in a foreign currency is translated into United States dollars by the use of the exchange rate in effect at that date. At the year-end date, unsettled monetary assets and liabilities are translated into United States dollars by using the exchange rate in effect at the year-end date and the related translation differences are recognized in net income.

Non-monetary assets and liabilities that are measured at historical cost are translated into United States dollars by using the exchange rate in effect at the date of the initial transaction and are not subsequently re-measured. Non-monetary assets and liabilities that are measured at fair value or a re-valued amount are translated into United States by using the exchange rate in effect at the date the value is determined and the related translation differences are recognized in net income or other comprehensive loss consistent with where the gain or loss on the underlying non-monetary asset or liability has been recognized.

ODIN MINING AND EXPLORATION LTD.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2012 AND 2011
(Expressed in U.S. Dollars)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

b) Cash and Cash Equivalents

Cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and subject to an insignificant risk of change in value. For cash flow statement presentation purposes, cash and cash equivalents includes bank overdrafts.

c) Mineral Exploration and Evaluation Costs

Pre-exploration Costs

Pre-exploration costs are expensed in the period in which they are incurred.

Exploration and Evaluation Expenditures

Once the legal right to explore a property has been acquired, which due to the political risk associated with exploration in Ecuador includes receipt of initial drilling permits, costs directly related to exploration and evaluation expenditures are capitalized. These direct expenditures include such costs as acquisition costs, permits and licenses, direct labour costs, materials used, surveying costs, drilling costs, payments made to contractors and depreciation on plant and equipment during the exploration phase. Costs not directly attributable to exploration and evaluation activities, including general administrative overhead costs, are expensed in the period in which they occur.

When a project is deemed to no longer have commercially viable prospects to the Company, exploration and evaluation expenditures in respect of that project are deemed to be impaired. As a result, those exploration and evaluation costs, in excess of estimated recoveries, are written off to the consolidated statement of comprehensive loss/income.

The Company assesses exploration and evaluation assets for impairment when facts and circumstances suggest that the carrying amount of an asset may exceed its recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use.

Once the technical feasibility and commercial viability of extracting the mineral resource has been determined, the property is considered to be a mine under development and is classified as 'mines under construction'. Exploration and evaluation assets are also tested for impairment before the assets are transferred to development properties.

As the Company currently has no operational income, any incidental revenues earned in connection with exploration activities are applied as a reduction of capitalized exploration costs.

Mineral exploration and evaluation expenditures are classified as intangible assets.

d) Deposits

Cash which is subject to contractual restrictions on use is classified separately as deposits. Security deposits required to be made to regulatory bodies, such as environmental or reclamation deposits, are classified as deposits.

e) Property, Plant and Equipment

Recognition and Measurement

On initial recognition, property, plant and equipment are valued at cost, being the purchase price and directly attributable cost of acquisition or construction required to bring the asset to the location and condition necessary to be capable of operating in the manner intended by the Company, including appropriate borrowing costs and the estimated present value of any future unavoidable costs of dismantling and removing items. The corresponding liability is recognized within provisions.

Property, plant and equipment is subsequently measured at cost less accumulated depreciation, less any accumulated impairment losses, with the exception of land which is not depreciated.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Subsequent Costs

The cost of replacing part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its costs can be measured reliably. The carrying amount of the replaced part is derecognized. The costs of the day-to-day servicing of property, plant and equipment are recognized in profit or loss as incurred.

ODIN MINING AND EXPLORATION LTD.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2012 AND 2011
(Expressed in U.S. Dollars)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

e) Property, Plant and Equipment - continued

Major Maintenance and Repairs

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the profit or loss during the financial period in which they are incurred.

Gains and Losses

Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount, and are recognized net within other income in profit or loss.

Depreciation

Depreciation is recognized in profit or loss or capitalized if used for exploration activities and is provided for over the asset's estimated useful life, as follows:

Computers and equipment	20% to 30% declining balance basis
Automotive	20% to 30% straight-line basis

Depreciation methods, estimated useful lives and residual values are reviewed at each year end and adjusted if appropriate. The effect of any changes in estimate is accounted for on a prospective basis.

f) Impairment of Non-Financial Assets

Impairment tests on intangible assets with indefinite useful economic lives are undertaken annually at the financial year-end. Other non-financial assets, including exploration and evaluation assets are subject to impairment tests whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. Where the carrying value of an asset exceeds its recoverable amount, which is the higher of value in use and fair value less costs to sell, the asset is written down accordingly.

Where it is not possible to estimate the recoverable amount of an individual asset, the impairment test is carried out on the asset's cash-generating unit, which is the lowest group of assets in which the asset belongs for which there are separately identifiable cash inflows that are largely independent of the cash inflows from other assets. The Company has one cash-generating unit for which impairment testing is performed.

Impairment loss is charged to profit or loss; except to the extent it reverses gains previously recognized in accumulated other comprehensive loss/income.

g) Financial Instruments

Financial Assets

Financial assets are classified into the following category based on the purpose for which the asset was acquired. All transactions related to financial instruments are recorded on a trade date basis. The Company's accounting policy is as follows:

Loans and receivables – Loans and receivables are comprised of cash, cash equivalents, short-term deposits and other receivables excluding HST. These assets are non-derivative financial assets resulting from the delivery of cash or other assets by a lender to a borrower in return for a promise to repay on a specified date or dates, or on demand. They are initially recognized at fair value plus transaction costs that are directly attributable to their acquisition or issue and subsequently carried at amortized cost, using the effective interest rate method, less any impairment losses. Amortized cost is calculated taking into account any discount or premium on acquisition and includes fees that are an integral part of the effective interest rate and transaction costs. Gains and losses are recognized in the profit or loss when the loans and receivables are derecognized or impaired, as well as through the amortization process.

Impairment of Financial Assets – At each reporting date the Company assesses whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or group of financial assets is deemed to be impaired, if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset and that event has an impact on the estimated future cash flows or the financial asset or the group of financial assets.

ODIN MINING AND EXPLORATION LTD.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2012 AND 2011
(Expressed in U.S. Dollars)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

g) Financial Instruments - continued

Financial Liabilities

Financial liabilities are classified as other financial liabilities, based on the purpose for which the liability was incurred, and comprise trade payable and accrued liabilities. These liabilities are initially recognized at fair value net of any transaction costs directly attributable to the issuance of the instrument and subsequently carried at amortized cost using the effective interest rate method. This ensures that any interest expense over the period to repayment is at a constant rate on the balance of the liability carrying in the statement of financial position. Interest expense in this context includes initial transaction costs and premiums payable on redemption, as well as any interest or coupon payable while the liability is outstanding.

Trade and other payable represent liabilities for goods and services provided to the Company prior to the end of the period which are unpaid.

Derivative Financial Instruments

The Company reviews the terms of its equity instruments and other financing arrangements to determine whether there are embedded derivative instruments that are required to be accounted for separately as a derivative financial instrument. Also, in connection with the issuance of financing instruments, the Company may issue freestanding options or warrants that may, depending upon their terms, be accounted for as derivative instrument liabilities because they are exercised in a currency other than the functional currency of the Company.

Derivative financial instruments are initially measured at their fair value. For derivative financial instruments that are accounted for as liabilities, the derivative instruments is initially recorded at its fair value and is then re-valued at each reporting date, with changes in the fair value reported as charges or credits to income. For warrant-based derivative financial instruments, the Company uses the Black-Scholes option pricing model to value the derivative instruments.

h) Provisions

Provision for Site Restoration

The Company is subject to various government laws and regulations relating to environmental disturbances caused by exploration and evaluation activities. The Company records the present value of the estimated costs of legal and constructive obligations required to restore the exploration sites in the period in which the obligation is incurred. The nature of the rehabilitation activities includes restoration, reclamation and re-vegetation of the affected exploration sites.

The rehabilitation provision generally arises when the environmental disturbance is subject to government laws and regulations. When the liability is recognized, the present value of the estimated cost is capitalized by increasing the carrying amount of the related exploration properties. Over time, the discounted liability is increased for the changes in present value based on current market discount rates and liability specific risks.

Additional environment disturbances or change in rehabilitation costs will be recognized as additional to the corresponding assets and rehabilitation liability in the period in which they occur.

As at December 31, 2012 and 2011, the Company had no site restoration obligations.

Other Provisions

Provisions are recognized for liabilities of uncertain timing or amount that have arisen as a result of past transactions, including legal or constructive obligations. The provision is measured at the best estimate of the expenditure required to settle the obligation at the reporting date.

i) Income Taxes

Income tax expense comprises current and deferred tax. Current tax and deferred tax are recognized in net income except to the extent that it relates to a business combination, or items recognized directly in equity or in other comprehensive loss/income.

Current income taxes are recognized for the estimated income taxes payable or receivable on taxable income or loss of the current year and any adjustment to income taxes payable in respect of previous years. Current income taxes are determined using tax rates and tax laws that have been enacted or substantively enacted by the year-end date.

Deferred tax assets and liabilities are recognized where the carrying amount of an asset or liability differs from its tax base, except for taxable temporary differences arising on the initial recognition of goodwill and temporary differences arising on the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transactions affects neither accounting of taxable profit or loss.

ODIN MINING AND EXPLORATION LTD.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2012 AND 2011
(Expressed in U.S. Dollars)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

i) Income Taxes - continued

Recognition of deferred tax assets of unused tax losses, tax credits and deductible temporary differences is restricted to those instances where it is probable that future taxable profit will be available against which the deferred tax asset can be utilized. At the end of each reporting period the Company reassesses unrecognized deferred tax assets. The Company recognizes a previously unrecognized deferred tax asset to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

j) Share capital and warrants

Share Capital

Equity instruments are contracts that give a residual interest in the net assets of the Company. Financial instruments issued by the Company are classified as equity only to the extent that they do not meet the definition of a financial liability or financial asset. The Company's common shares and share warrants are classified as equity instruments.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Warrants

The Company uses the residual value method to value warrants that are equity instruments issued as part of private placement units. The fair value of warrants is calculated by deducting the fair value of the share component of the unit from the total unit price. The fair value assigned to warrants is recorded as a reduction to share capital and an increase in warrant reserve. If the warrants are exercised the entry is reversed. If the warrants expire unexercised, the value is reallocated to retained earnings / deficit.

The fair value of warrants determined to be financial instruments is calculated and recorded as a derivative liability as discussed above under derivative financial instruments.

k) Earnings (Loss) per share

Basic earnings (loss) per common share is computed by dividing the net income (loss) available to common shareholders of the Company by the weighted average number of shares outstanding for the relevant year.

Diluted earnings (loss) per common share is computed by dividing the net income (loss) applicable to common shareholders by the sum of the weighted average number of common shares outstanding plus all additional common shares that would have been outstanding, if potentially dilutive instruments were converted.

The Company has a stock option plan under which it grants stock options to directors, employees, consultants and service providers.

Where equity-settled share options are awarded to employees, the fair value of the options at the date of grant is charged to the statement of comprehensive loss/income over the vesting period. Performance vesting conditions are taken into account by adjusting the number of equity instruments expected to vest at each reporting date so that, ultimately, the cumulative amount recognized over the vesting period is based on the number of options that eventually vest. Non-vesting conditions and market vesting conditions are factored into the fair value of the options granted. As long as all other vesting conditions are satisfied, a charge is made irrespective of whether these vesting conditions are satisfied. The cumulative expense is not adjusted for failure to achieve a market vesting condition or where a non-vesting condition is not satisfied.

Where the terms and conditions of options are modified before they vest, the increase in fair value of the options, measured immediately before and after the modification, is also charged to the statement of comprehensive loss/income over the remaining vesting period.

Where equity instruments are granted to employees, they are recorded at the fair value of the equity instrument granted at the grant date. The grant date fair value is recognized in comprehensive loss/income over the vesting period, described as the period during which all the vesting conditions are to be satisfied.

Where equity instruments are granted to non-employees, they are recorded at the fair value of the goods or services received in the statement of comprehensive loss/income. Options or warrants granted related to the issuance of shares are recorded as a reduction of share capital.

When the value of goods or services received in exchange for the share-based payment cannot be reliably estimated, the fair value is measured by use of a valuation model.

ODIN MINING AND EXPLORATION LTD.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2012 AND 2011
(Expressed in U.S. Dollars)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

l) Share-based payments - continued

All equity-settled share-based payments are reflected in share-based payment reserve, until exercised. Upon exercise the fair value of is credited to share capital, along with the cash consideration, with an offsetting reduction in the share-based payment reserve. When options expire unexercised the fair value of the options expiring is credited to deficit with an offsetting reduction in the share-based payment reserve.

Where a grant of options is cancelled or settled during the vesting period, excluding forfeitures when vesting conditions are not satisfied, the Company immediately accounts for the cancellation as an acceleration of vesting and recognizes the amount that otherwise would have been recognized for services received over the remainder of the vesting period. Any payment made to the employee on the cancellation is accounted for as the repurchase of an equity interest except to the extent the payment exceeds the fair value of the equity instrument granted, measured at the repurchase date. Any such excess is recognized as an expense.

m) Standards, Amendments and Interpretations Not Yet Effective

Certain pronouncements were issued by the IASB of the IFRS Interpretations Committee that are mandatory for accounting periods beginning after January 1, 2012 or later years.

New standards, interpretations and amendments effective from January 1, 2012

None of the new standards, interpretations and amendments, effective for the first time from January 1, 2012 have had a material effect on the consolidated financial statements:

New standards, interpretations and amendments not yet effective

The following new standards, interpretations and amendments, which have not been applied in these consolidated financial statements, will or may have an effect on the Company's future financial statements:

IFRS 9 *Financial Instruments* is part of the IASB's wider project to replace IAS 39 *Financial Instruments: Recognition and Measurement*. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized costs and fair value. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. The standard is effective for annual periods beginning on or after January 1, 2015. The Company has determined the new standard will not have a material impact on its financial statements.

IFRS 10 *Consolidated Financial Statements* builds on existing principles by identifying the concept of control as the determining factor in whether an entity should be included within the consolidated financial statements of the parent company. The standard provides additional guidance to assist in the determination of control where this is difficult to assess. The Company has determined there will be no impact on the financial statements and intends to adopt the standard no later than the accounting period beginning on January 1, 2013.

IFRS 11 *Joint Arrangements* describes the accounting for arrangements in which there is joint control; proportionate consolidation is not permitted for joint ventures (as newly defined). IFRS 11 replaces IAS 31 *Interest in Joint Ventures* and SIC 13 *Jointly Controlled Entities – Non-Monetary Contributions by Venturers*. The Company has determined there will be no impact on the financial statements and intends to adopt the standard no later than the accounting period beginning on January 1, 2013.

IFRS 12 *Disclosure of Interest in Other Entities* includes the disclosure requirements for all forms of interest in other entities, including joint arrangements, associates, special purpose vehicles and other off balance sheet vehicles. The Company has determined there will be no impact on the financial statements and intends to adopt the standard no later than the accounting period beginning on January 1, 2013.

Not yet Effective

IFRS 13 *Fair Value Measurement* aims to improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across IFRSs. The requirements, which are largely aligned between IFRSs and US GAAP, do not extend the use of fair value accounting but provide guidance on how it should be applied where its use is already required or permitted by other standards with IFRSs or US GAAP. The Company has determined there will be no impact on the financial statements and intends to adopt the standard no later than the accounting period beginning on January 1, 2013.

IFRIC 20 *Stripping Costs in the Production Phase of a Surface Mine*, the IFRS Interpretations Committee, sets our principles for the recognition of production stripping costs in the balance sheet. The interpretation recognizes that some production stripping in surface mining activity will benefit production in future periods and sets out criteria for capitalizing such costs. The Company has determined there will be no impact on the financial statements and intends to adopt the standard no later than the accounting period beginning on January 1, 2013.

(Expressed in U.S. Dollars)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

m) Standards, Amendments and Interpretations Not Yet Effective - continued

IAS 1 Presentation of Financial Statements was amended to change the grouping of items presented in OCI. Items that would be reclassified to profit or loss at a future point in time will be presented separately from items that will never be reclassified. The amendments do not change the nature of the items that are currently recognized in OCI, nor do they impact the determination of whether items in OCI are reclassified through profit or loss in future periods. The Company has determined there will be no impact on the financial statements and intends to adopt the standard no later than the accounting period beginning on January 1, 2013.

There are no other new standards, interpretations and amendments, which are effective for period beginning after January 1, 2013 and which have not been adopted early, are expected to have a material effect on the Company's future consolidated financial statements.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

Judgments

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustments to the carry amounts of assets and liabilities recognized in the financial statements within the next financial year are discussed below:

Title to Mineral Property Interests – Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

Exploration and Evaluation Expenditure – The application of the Company's accounting policy for exploration and evaluation expenditure requires judgment in determining whether is likely that future economic benefits will flow to the Company.

If, after exploration and evaluation expenditure is capitalized, information becomes available suggesting that the carrying amount of an exploration and evaluation asset may exceed its recoverable amount the Company carries out an impairment test at the cash generating unit or group of cash generating units level in the year the new information becomes available. The Company has determined that there are currently no indicators of impairment.

Income Taxes – The Company has not recognized a deferred tax asset as management believe it is not probable that taxable profit will be available against which a deductible temporary differences can be utilized.

Share-based Payment and Warrant Valuation Transactions – The Company measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the stock option, volatility and dividend yield and making assumptions about them. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in note 10.

The Company measures the fair value of warrants determined to be financial instruments at the date they are granted. The fair value is calculated and recorded as a derivative liability as discussed above under derivative financial instruments. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the stock option, volatility and dividend yield and making assumptions about them. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in note 8.

7. EXPLORATION AND EVALUATION ASSETS

The Company has entered into a number of agreements to acquire mining concessions or options to acquire mining concessions in Ecuador, as detailed below. On April 18, 2008 the government of Ecuador passed a Mining Mandate to draft and implement a new mining law. This Mining Mandate superseded the existing mining law and international investment agreements under which mineral concessions were granted and investment were made. In addition, the government cancelled certain mining concessions due to non-payment of patent taxes and indicated potential cancellation of certain mining concessions for late payment of patent taxes, including certain of the Company's concessions.

In January 2009, a new Mining Law for Ecuador was published in the State's Official Register, thereby becoming law. Uncertainties in the Law were clarified with the enactment of the Regulations in November 2009, cancelling the Mining Mandate and reinstating mining activities.

Despite the enactment of the new Mining Law, the lack of accompanying Regulations and formal notification to the Company to continue exploration efforts resulted in the Company suspending any exploration activities. Prior to the Company receiving approval for exploratory drilling in 2011, the Company charged all exploration and evaluation costs to the consolidated statement of comprehensive loss.

In September 2011 the Company received drilling and other permits required to commence further exploration of its properties. From that date the Company has capitalized all expenditures directly related to the exploration of its mineral properties.

The Company has or has rights to 12 separate mineral titles located near Machala South West Ecuador, known as the "Cangrejos Concessions". The mineral rights payments related to those concessions in 2012 amounted to \$183,859 (2011 - \$263,983).

During the year ended December 31, 2012, \$17,487 (2011 - \$9,612) depreciation was capitalized to exploration and evaluation assets.

ODIN MINING AND EXPLORATION LTD.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in U.S. Dollars)

7. EXPLORATION AND EVALUATION ASSETS – Continued

In addition to the above mineral titles, on September 20, 2007, the Company entered into an option agreement to acquire a mining right in the contiguous properties known as the “Castro Concessions”. The agreement, as amended December 23, 2009 and July 13, 2012, calls for payments totalling \$2,400,000 to complete the acquisition of the mineral rights, payable as follows: December 31, 2007 -\$80,000 (paid); December 20, 2009 - \$80,000 (paid); September 20, 2011 - \$180,000 (paid); later of June 30, 2012 and completion of fund raising approved by the TSX-V - \$100,000 (paid); July 30, 2013 - \$100,000; July 30, 2014 - \$460,000; and July 30, 2015 - \$1,400,000.

The Company has purchased various small local farm lands (Note 6, Land) in the area of its Cangrejos properties that are of strategic value representing important surface rights over which it has mineral rights and access.

2012 Expenditures

Balance at December 31, 2011	\$ 985,063

8. DERIVATIVE LIABILITY FOR WARRANTS

The derivative liabilities, consists of options to non-employees and common share purchase warrants with an exercise price in a different currency than the Company's functional currency and are measured at their respective fair values at each reporting period as follows:

	2012	2011
Balance, beginning	\$ 459,167	\$ 1,488,673
Less: Fair value adjustment	(459,167)	(1,029,506)
Balance, ending	\$ -	\$ 459,167

The fair value of derivative warrants is calculated using the Black-Scholes option pricing model.

Warrants expiring December 24, 2012

During 2010 the Company issued 14,056,875 share purchase warrants. The warrants entitle the holder to acquire one common share at a price of C\$0.30 per share to December 24, 2012. The estimated fair value of these incentive warrants at the grant date was \$1,676,001 using the following assumptions in Black-Scholes model: Risk-free interest rate - 1.69%; Expected life - 2 years; Expected volatility - 131%; and Expected dividends - \$NIL. The fair value was initially recorded as a share issue cost and derivative liability.

At December 31, 2011 the fair value of the warrants was revalued and was estimated to be \$459,167

Assumptions used in Black-Scholes calculation at December 31, 2011: Risk-free interest rate - 1.02%; Expected life - 1 year; Expected volatility - 125%; and Expected dividends - 0%.

	December 31, 2011	December 31, 2010
Risk – free interest rate	1.02%	1.57%
Expected life	1 year	1.6 years
Expected volatility	125%	134%
Expected dividends	0%	0%

At December 31, 2012 all warrants had expired.

9. SHARE CAPITAL AND RESERVES

a) Authorized

The Company's authorized capital consists of 200,000,000 (December 31, 2011 – 200,000,000) common shares without par value.

The holders of common shares are entitled to receive dividends, which may be declared from time to time, and are entitled to one vote per share at meetings of the Company.

b) Issued

Year ended December 31, 2012

- (i) On August 27, 2012 the Company issued 13,450,000 common shares pursuant to a non-brokered private placement for proceeds of \$1,338,632. The Company incurred share issue costs in the amount of \$19,420 for legal and filing fees in relation to this private placement.

Year ended December 31, 2011

- (i) On June 21, 2011 the Company issued 437,500 common shares on the exercise of warrants for proceeds of \$89,603.

9. SHARE CAPITAL AND RESERVES – Continued

c) Share Purchase Warrants

A summary of the Company's outstanding share purchase warrants at December 31, 2012 and 2011 and the changes during the years then ended is presented below:

	Number of warrants	Weighted Average Exercise price (Canadian \$)
Warrants outstanding, December 31, 2010	18,750,000	C\$0.27
Warrants exercised	(437,500)	C\$0.20
Warrants expired	(4,255,625)	C\$0.20
Warrants outstanding, December 31, 2011	14,056,875	C\$0.30
Warrants expired	(14,056,875)	C\$0.30
Warrants outstanding, December 31, 2012	-	-

d) Nature and Purpose of Equity and Reserves

The reserves recorded in equity on the Company's balance sheet include, 'Share-based Payment Reserve', and 'Accumulated Deficit'.

- 'Share-based Payment Reserve' is used to recognize the value of stock option grants prior to exercise and to recognize the value of share warrants prior to exercise.
- 'Accumulated Deficit' is used to record the Company's change in deficit from earnings from period to period.

10. SHARE-BASED PAYMENTS

a) Option Plan Details

The Company has established an Incentive Share Option Plan for directors, officers, employees and consultants, enabling them to purchase common shares. The total number of options outstanding at any time cannot exceed 10% of the total number of outstanding common shares. The number of options granted to any individual shall not exceed 5% of the issued and outstanding shares of the Company from time to time. The number of options granted to consultants or investor relations consultants shall not exceed 2% of the issued and outstanding shares of the Company from time to time. The number of options granted to insiders shall not exceed 10% of the issued and outstanding shares of the Company from time to time. Each option granted under the plan is for a maximum term of five years. The exercise price of the options granted under the plan is established by the Board of Directors of the Company and cannot be less than the Discounted Market Price as calculated and defined in accordance with the policies of the TSX Venture Exchange. The options vest 25% on the date of grant and 25% every three months thereafter, except for options issued to employees or consultants conducting investor relations vest in stages over 12 months with no more than one-quarter of the Options vesting in any three month period.

The following table summarizes stock option activity for the years ending December 31, 2012 and 2011:

	Number	Weighted Average Exercise Price
Balance, December 31, 2010 and December 31, 2011	4,815,000	C\$0.25
Stock options expired	(675,000)	C\$0.25
Stock options cancelled	(1,060,000)	C\$0.25
Stock options granted	145,000	C\$0.14
Balance December 31, 2012	3,225,000	C\$0.25

10. SHARE-BASED PAYMENTS – Continued

a) Option Plan Details - continued

The following table summarizes information relating to stock options outstanding and exercisable at December 31, 2012:

Exercise Price per share (Canadian \$)	Number Outstanding	Expiry	Weighted Average Remaining Contractual Life (Years)	Number unvested - not exercisable	Number Vested - exercisable
C\$0.25	3,100,000	October 26, 2015	2.81	-	3,100,00
C\$0.17	20,000	October 1, 2016	3.74	-	20,000
C\$0.20	105,000	December 20, 2016	3.96	-	105,000
	<u>3,225,000</u>		<u>2.85</u>	<u>-</u>	<u>3,225,000</u>

b) Expenses Arising from Share-based Payment Transactions

During of the year ended December 31, 2012 the Company recorded stock-based compensation expense totaling \$20,000 (\$14,286 as geological expenditures and \$5,714 as general and administration) in the consolidated statement of operations. During the year ended December 31, 2011 the Company recorded stock-based compensation expense of \$132,726 as director's fees and \$5,205 as wages and benefits included in employee costs and \$3,470 as other expenses in the statement of operations.

11. OTHER INCOME AND EXPENSES

	2012	2011
Interest and other income or gains include:		
Interest income	\$ 4,938	\$ 31,061
Foreign exchange gain	27,810	-
	<u>\$ 32,748</u>	<u>\$ 31,061</u>
Other expenses include:		
General and administration	\$ 78,074	\$ 42,702
Insurance	18,105	9,674
Professional fees	124,048	75,841
Rent	5,152	-
Foreign exchange loss	-	54,660
	<u>\$ 225,379</u>	<u>\$ 182,877</u>

12. RELATED PARTY TRANSACTIONS AND BALANCES

Key management includes directors (executive and non-executive) and senior management (CEO and acting CFO). The compensation paid or payable to key management for employee services is disclosed in the table below:

	Years ended December 31	
	2012	2011
Short-term employee benefits		
Executive salaries and remuneration	\$ 79,348	\$ 32,984
Directors' fees	58,053	24,315
	<u>137,401</u>	<u>57,299</u>
Share-based payments	-	132,726
	<u>\$ 137,401</u>	<u>\$ 190,025</u>

For the year ended December 31, 2011, \$48,586 directors' fees were paid in advance. Therefore, at December 31, 2011 there were prepaid directors' fees of \$48,586 amounts that relate to the period January 1, 2012 to June 30, 2012.

(Expressed in U.S. Dollars)

13. INCOME TAXES

Income Taxes

	2012	2011
Current tax expense	\$ -	\$ -
Deferred tax expense	-	-
	\$ -	\$ -

Taxation in the Company and its subsidiaries' operational jurisdiction is calculated at the rate prevailing in its respective jurisdiction.

The difference between tax expense for the year and the expected income taxes based on the statutory tax rate arises as follows:

	2012	2011
Net income before income taxes	\$ 56,034	\$ 247,769
Tax charge/(recovery) based on statutory rate of 25.00% (2011: 26.50%)	\$ 14,000	\$ 73,000
Effect of reduction in statutory rate	4,000	7,000
Non-deductible expenses	(113,000)	(235,000)
Foreign income taxed at other than Canadian statutory rates	1,000	8,000
Share issuance costs	(5,000)	-
Impact of over provision in the previous year	(120,000)	-
Other	(2,000)	-
Change in unrecognized deferred tax assets	221,000	147,000
Deferred tax expense /(recovery)	\$ -	\$ -

Effective January 1, 2012, the Canadian Federal corporate tax rate decreased from 16.50% to 15.00%, and the British Columbia provincial tax rate remained the same at 10.00%. The statutory tax rate for Ecuador decreased from 24.00% to 23.00%, effective January 1, 2012.

Deferred Tax Assets and Liabilities

No deferred tax asset has been recognized in respect of the following losses and temporary differences as it is not considered probable that sufficient future taxable profit will allow the deferred tax to be recovered:

	2012	2011
Non-capital losses	\$ 812,000	\$ 587,000
Capital losses	1,238,000	1,251,000
Un-deducted financing costs	6,000	4,000
Capital assets	11,000	7,000
Exploration and evaluation assets	84,000	81,000
Unrecognized deferred tax asset	(2,151,000)	(1,930,000)
Deferred tax liability	\$ -	\$ -

As at December 31, 2012, the Company has estimated non-capital losses for Canadian tax purposes of \$3,224,000, and \$34,000 for Ecuador, that may be carried forward to reduce taxable income derived in future years. The Canadian non-capital losses are summarized below.

Non-capital Canadian tax losses expiring as follows:

Year of Expiry	Taxable Losses
2024	\$ 156,000
2025	227,000
2026	826,000
2027	129,000
2028	542,000
2029	111,000
2030	653,000
2031	223,000
2032	357,000
Total	\$ 3,224,000

14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company is exposed through its operations to the following financial risks:

- Market Risk
- Credit Risk
- Liquidity Risk

In common with all other businesses, the Company is exposed to risks that arise from its use of financial instruments. This note describes the Company's objectives, policies and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is present throughout these consolidated financial statements.

There have been no substantive changes in the Company's exposure to financial instrument risks, its objectives, policies, and processes for managing those risks or the methods used to measure them from previous years unless otherwise stated.

General Objectives, Policies and Processes

The Board of Directors has overall responsibility for the determination of the Company's risk management objectives and policies and, whilst retaining ultimate responsibility for them, it has delegated the authority for designing and operating processes that ensure the effective implementation of the objectives and policies to the Company's finance function.

The overall objective of the Board is to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility. Further details regarding these policies are set out below:

i) **Market Risk**

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices are comprised of three types of risk as follows:

Foreign Currency Risk

Foreign currency risk is the risk that a variation in exchange rates between the US dollar and the Canadian dollar or other foreign currencies will affect the Company's operations and financial results. The Company could have exposure to foreign currency risk. The Company's functional currency is US dollars but it raises some of its capital in Canadian dollars. The Company has not hedged its exposure to currency fluctuations.

Interest Rate Risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company does not have any borrowings. Interest rate risk is limited to potential decreases on the interest rate offered on cash, cash equivalents and short-term deposits held with Canadian financial institutions. The Company considers this risk to be immaterial.

Equity risk

Equity risk is the uncertainty associated with the valuation of assets arising from changes in equity markets.

ii) **Credit Risk**

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. Financial instruments which are potentially subject to credit risk for the Company consist primarily of cash and equivalents, short-term deposits, other receivables and environmental deposit. Cash and equivalents and short-term deposits are maintained with financial institutions of reputable credit and may be redeemed upon demand.

The carrying amount of financial assets represents the maximum credit exposure. The Company has gross credit exposure at December 31, 2012 and December 31, 2011 relating to cash and equivalents and short-term deposits of \$1,000,140 and \$1,550,273 respectively. All cash, cash equivalents and short-term deposits are held at HSBC Canada. The Company considers this risk to be minimal for all cash and cash equivalent assets.

iii) **Liquidity Risk**

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company's policy is to ensure that it will always have sufficient cash to allow it to meet its liabilities when they become due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. The key to success in managing liquidity is the degree of certainty in the cash flow projections. If future cash flows are fairly uncertain, the liquidity risk increases.

ODIN MINING AND EXPLORATION LTD.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2012 AND 2011
(Expressed in U.S. Dollars)

14. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT - Continued

iii) Liquidity Risk - continued

Typically, the Company ensures that it has sufficient cash on demand to meet expected operational expenses for a period of 180 days. To achieve this objective, the Company prepares annual operating and capital expenditure budgets, which are regularly monitored and updated as considered necessary. Further, the Company utilizes authorizations for expenditures on explorations projects to further manage expenditures.

The Company monitors its risk of shortage of funds by monitoring the maturity dates of existing trade and other accounts payable.

The following table sets out the contractual maturities (representing undiscounted contractual cash flows) of financial liabilities

Determination of Fair Value

Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

The Consolidated Statement of Financial Position carrying amounts for cash and cash equivalents and trade and other payables approximate fair value due to their short-term nature. Due to the use of subjective judgments and uncertainties in the determination of fair values these values should not be interpreted as being realizable in an immediate settlement of the financial instruments.

Fair Value Hierarchy

Financial instruments that are measured subsequent to initial recognition at fair value are grouped in Levels 1 to 3 based on the degree to which the fair value is observable:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

15. CAPITAL MANAGEMENT

The Company monitors its cash, common shares, warrants and stock options as capital. The Company's objectives when maintaining capital are to maintain sufficient capital base in order to meet its short-term obligations and at the same time preserve investor's confidence required to sustain future development and production of the business.

The Company is not exposed to any externally imposed capital requirements.

16. SEGMENTAL REPORTING

The Company is organized into business units based on mineral properties and has one reportable operating segment, being that of acquisition and exploration and evaluation activities in Ecuador.

17. EARNINGS PER SHARE

Basic earnings (loss) per share amounts are calculated by dividing the net profit (loss) for the year by the weighted average number of shares outstanding during the year.

	2012	2011
Income attributable to ordinary shareholders	\$ 56,034	\$ 247,769
Weighted average number of common shares	88,651,571	83,815,079
Basic and diluted earnings (loss) per share	\$ 0.00	\$ 0.00
