NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

Three months ended March 31, 2016

(expressed in U.S. dollars)

1. NATURE OF OPERATIONS

Odin Mining and Exploration Ltd. ("Odin" or the "Company") is a publicly listed company incorporated under the Business Corporation Company Act of British Columbia on March 22, 1988. The Company is listed on the TSX-Venture Exchange, having the symbol ODN.V. Odin and its wholly-owned subsidiaries (collectively referred to as the "Group") are engaged in the acquisition, exploration and development of mineral resources in Ecuador. The Group is considered to be in the exploration stage as it has not placed any of its mineral properties into production.

The Company's head office and principal business address is Suite 410, 625 Howe Street, Vancouver, British Columbia, V6C 2T6. The Company's registered and records office is located at 1200 – 200 Burrard Street, Vancouver, British Columbia, V7X 1T2.

2. BASIS OF PREPARATION, GOING CONCERN AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of preparation

These condensed consolidated interim financial statements for the three months ended March 31, 2016, have been prepared in accordance with IAS 34 *Interim Financial Reporting*. They do not include all of the information and disclosures required in full annual financial statements and should be read in conjunction with the Group's annual financial statements as at December 31, 2015 which have been prepared in accordance with International Financial Reporting Standards ("IFRS"). These condensed consolidated interim financial statements have been prepared on a historical cost basis and are presented in U.S. dollars, except as specifically noted for Canadian dollar amounts shown as "C\$".

These condensed consolidated interim financial statements were approved and authorized for issue by the Board of Directors on May 26, 2016.

(b) Going concern

These condensed consolidated interim financial statements have been prepared on the going concern basis which assumes that the Company will be able to realize, in the foreseeable future, its assets and discharge its liabilities in the normal course of business as they come due. The Company has incurred cumulative losses of \$22,950,317 as at March 31, 2016 and has reported a net loss of \$503,934 for the three months ended March 31, 2016. The ability of the Company to continue as a going concern is dependent upon successfully obtaining additional financing, entering into a joint venture, a merger or other business combination transaction involving a third party, sale of all or a portion of the Company's assets, the outright sale of the Company, the successful development of the Company's mineral property interests or a combination thereof.

The Company believes that, based on forecasts and the ability to reduce expenditures if required, along with indications of shareholder support, it will be able to continue as a going concern for the foreseeable future. However, the Company will require additional funding in the near-term and management is currently evaluating the alternatives presently available to the Company. There can be no assurance that management's plans will be successful. These factors indicate the existence of a material uncertainty that may cast significant doubt upon the Company's ability to continue as a going concern. These condensed consolidated interim financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

(c) Significant accounting policies

The significant accounting policies that have been applied, on a consistent basis, in the preparation of these condensed consolidated interim financial statements are included in the Group's audited consolidated financial statements for the year ended December 31, 2015. Those accounting policies have been used throughout all periods presented in the condensed consolidated interim financial statements. There were no new accounting standards effective January 1, 2016 that had an impact on the Company's financial statements.

(d) Significant accounting judgments and estimates

The preparation of the Group's consolidated financial statements in accordance with IFRS requires management to make certain judgments, estimates and assumptions about recognition and measurement of assets, liabilities, income and expenses. Actual results are likely to differ from these estimates. Information about the significant judgments, estimates and assumptions that have the most significant effect on the recognition and measurement of assets, liabilities, income and expenses in these condensed consolidated interim financial statements are discussed below.

2. BASIS OF PREPARATION, GOING CONCERN AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(d) Significant accounting judgments and estimates (continued)

Judgments

Going concern: The assessment of the Company's ability to continue as a going concern requires significant judgment. The Company considers the factors outlined in Note 2(b) when making its going concern assessment.

Exploration and evaluation assets: The application of the Group's accounting policy for exploration and evaluation assets requires judgment in determining whether it is likely that such acquisition costs incurred will be recovered through successful exploration and development or sale of the asset under review. Furthermore, the assessment as to whether economically recoverable resources exist is itself an estimation process. Estimates and assumptions made may change if new information becomes available. If, after expenditure is capitalized, information becomes available suggesting that the recovery of expenditure is unlikely, the amount capitalized is written off to profit or loss in the period when the new information becomes available. The carrying value of these assets is detailed at Note 6(a).

Estimates and assumptions

Share-based payments: The Company utilizes the Black-Scholes Option Pricing Model ("Black-Scholes") to estimate the fair value of stock options granted to directors, officers and employees. The use of Black-Scholes requires management to make various estimates and assumptions that impact the value assigned to the stock options including the forecast future volatility of the stock price, the risk-free interest rate, dividend yield and the expected life of the stock options. Any changes in these assumptions could have a material impact on the share-based payment calculation value.

Deferred tax assets: The assessment of the probability of future taxable income against which deferred tax assets can be utilized is based on the Group's future planned activities, supported by budgets that have been approved by the Board of Directors. Management also considers the tax rules of the various jurisdictions in which the Group operates. Should there not be a forecast of taxable income that indicates the probable utilization of a deferred tax asset or any portion thereof, the Group does not recognize the deferred tax asset.

(e) Standards issued but not yet effective

The standards and interpretations that are issued, but not yet effective, up to the date of authorization of these condensed consolidated interim financial statements are disclosed below. Management anticipates that all of the pronouncements will be adopted in the Group's accounting policy for the first period beginning after the effective date of the pronouncement. Information on new standards, amendments and interpretations that are expected to be relevant to the Group's financial statements is provided below. Certain other new standards and interpretations have been issued but are not expected to have a material impact on the Group's consolidated financial statements.

IFRS 15 – Revenue from Contracts with Customers: The IASB issued IFRS 15 in May 2014. The new standard provides a comprehensive framework for recognition, measurement and disclosure of revenue from contracts with customers, excluding contracts within the scope of the standards on leases, insurance contracts and financial instruments. IFRS 15 is effective for annual periods beginning on or after January 1, 2018 and is to be applied retrospectively with early adoption permitted. Management is currently evaluating the impact the final standard is expected to have on the Group's consolidated financial statements. This is not expected to be significant as the Company is currently not generating operating revenues.

IFRS 9 – Financial Instruments: The IASB published the final version of IFRS 9 in July 2014. The final standard brings together the classification, measurement, impairment and hedge accounting phases of the IASB's project to replace IAS 39 *Financial Instruments: Recognition and Measurement*. IFRS 9 includes a loss impairment model, amends the classification and measurement model for financial assets and provides additional guidance on how to apply the business model and contractual characteristics test. This final version of IFRS 9 supersedes all previous versions of IFRS 9 and is effective for annual periods commencing on or after January 1, 2018, with early adoption permitted. Management is currently evaluating the impact the final standard is expected to have on the Group's consolidated financial statements.

2. BASIS OF PREPARATION, GOING CONCERN AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(e) Standards issued but not yet effective (continued)

IFRS 16 – Leases: On January 13, 2016, the IASB published a new standard, IFRS 16, eliminating the current dual accounting model for lessees, which distinguishes between on-balance sheet finance leases and off-balance sheet operating leases. Under the new standard, a lease becomes an on-balance sheet liability that attracts interest, together with a new right-of-use asset. In addition, lessees will recognize a front-loaded pattern of expense for most leases, even when cash rentals are constant. IFRS 16 is effective for annual periods beginning on or after January 1, 2019, with earlier adoption permitted. The Company is assessing the impact of adopting this standard on its consolidated financial statements.

3. CASH AND CASH EQUIVALENTS

The Group's cash and cash equivalents at March 31, 2016, consisted of cash of \$209,020 and cash equivalents of \$241,045 (December 31, 2015 – cash of \$353,846 and cash equivalents of \$440,759). The Group's cash and cash equivalents are denominated in the following currencies and include the following components:

	March 31, 2016		December 31, 2015	
Cash at bank and in hand – Canadian dollars	\$	131,302	\$	216,322
Cash at bank and in hand – U.S. dollars		77,718		137,524

GST	\$	5,555	\$	5,242
Other		69,708		234
Total receivables	\$	75,263	\$	5,476

All amounts are short-term and the net carrying value of receivables is considered a reasonable approximation of fair value. The Group anticipates full recovery of these amounts and therefore no impairment has been recorded against receivables. The Group's receivables are all considered current and are not past due. The Group does not hold any collateral related to these assets. Included in other is an amount of \$69,615 relating to a refund of the Group's environmental deposit which was received in April 2016.

5. PROPERTY AND EQUIPMENT

6. EXPLORATION AND EVALUATION ASSET AND EXPENDITURES

(a) Exploration and evaluation asset

The Group has five separate mineral titles located near Machala in southwest Ecuador, collectively known as the “Cangrejos Project.” Two of the mineral titles were acquired by way of an option agreement (the “Castro Agreement”) which was entered into on September 20, 2007 with the final payment being made on October 2, 2015. The carrying value of the mineral titles obtained via the Castro Agreement is \$1,701,100 at March 31, 2016 (December 31, 2015 - \$1,701,100).

(b) Exploration and evaluation expenditures

8. SHARE-BASED PAYMENTS

(a) Stock option plan

The Company has a stock option plan (the "Plan") whereby the Company may grant options to directors, officers, employees and consultants of the Company. The maximum number of shares that may be reserved for issuance under the Plan is limited to 10% of the total number of issued and outstanding shares on the date options are granted. In addition, the number of shares which may be reserved for issuance to any one individual may not exceed 5% of the issued shares on a yearly basis or 2% if the optionee is engaged in investor relations activities or is a consultant. Options are exercisable over periods of up to five years as determined by the Board and are required to have an exercise price no less than the closing market price of the Company's shares prevailing on the day that the option is granted less a discount of up to 25%, the amount of the discount varying with market price in accordance with the policies of the TSX Venture Exchange. The Plan contains no vesting requirements, but permits the Board to specify a vesting schedule in its discretion.

During the period ended March 31, 2016, the Company granted no stock options (period ended March 31, 2015 – nil). The weighted average share price at the date of exercise of stock options was \$0.40 for the three months ended March 31, 2016 (three months ended March 31, 2015 – not applicable).

Pursuant to the Company's accounting policy for share-based payments, the fair value of options vesting during the three months ended March 31, 2016, in the amount of \$108,687 (2015 - \$242,258) has been recorded in the consolidated statement of comprehensive loss. Of this amount, \$74,914 has been included in fees, salaries and other employee benefits (Note 9) (2015 - \$170,130) and \$33,773 has been expensed to exploration and evaluation expenditures (Note 6(b)) (2015 - \$72,128).

(b) Outstanding stock options

Stock options and weighted average exercise prices are as follows for the reporting periods presented:

	Three months ended March 31,					
	2016		2015			
	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price		
Outstanding, beginning of period	5,387,000	C\$ 0.54	4,431,667	C\$ 0.68

9. FEES, SALARIES AND OTHER EMPLOYEE BENEFITS

	Three months ended March 31,

Fees, salaries	\$ 74,028	\$ 148,588
Social security and health benefits	113	137
Share-based payments (Note 8(a))	74,914	170,130
Fees, salaries and other employee benefits	\$ 149,055	\$ 318,855

10. LOSS PER SHARE

The calculation of basic and diluted loss per common share is based on the following data:

	Three months ended March 31,	
	2016	2015
Net loss	\$ 503,934	\$ 1,156,747
Weighted average number of common shares outstanding (basic and diluted)	132,989,371	119,350,351
Loss per share – basic and diluted	\$ 0.004	\$ 0.01

Basic loss per share is computed by dividing the net loss by the weighted average number of common shares outstanding during the period. The diluted loss per share reflects the potential dilution of common share equivalents, such as stock options, in the weighted average number of common shares outstanding during the period, if dilutive.

All of the stock options currently issued (see Note 8) were anti-dilutive for the three month periods ended March 31, 2016 and 2015.

11. CAPITAL RISK MANAGEMENT

It is the Company's objective when managing capital to safeguard its ability to continue as a going concern in order that it may continue to explore and develop its mineral properties and continue its operations for the benefit of its shareholders. The Company's objectives when managing capital are to:

- (a) continue the exploration and development of its mineral properties;
- (b) support any expansion plans; and
- (c) maintain a capital structure which optimizes the cost of capital at acceptable risk.

The Company considers its equity, which includes common shares, share-based payment reserve and accumulated deficit as capital. The Company intends to spend existing working capital by carrying out its planned acquisition, exploration and development activities on mineral properties and continuing to pay administrative costs.

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristic of the underlying assets. In order to maintain or adjust the capital structure the Company may issue new common shares. In order to facilitate analysis and management of its capital requirements, the Company prepares and updates annual budgets (as needed) to ensure that its acquisition and exploration operations can continue to progress. Budgets, once finalized, are approved by the Board of Directors. There have not been any changes to the Company's capital management objectives, policies and processes compared to the prior year. The Company is not subject to any externally imposed capital requirements.

12. FINANCIAL INSTRUMENTS

(a) Categories of financial assets and financial liabilities

The Group's financial assets and financial liabilities are categorized as follows:

	Category	March 31, 2016	December 31, 2015
Cash and cash equivalents	Loans and receivables	\$ 450,065	\$ 794,605
Other receivables	Loans and receivables	69,708	234
Accounts payable and accrued liabilities	Other financial liabilities	93,844	38,612

The recorded amounts for cash and cash equivalents, other receivables and accounts payable and accrued liabilities approximate their fair value due to their short-term nature. Income earned on the Group's cash and cash equivalents has been disclosed in the consolidated statements of comprehensive loss under the caption "interest income and other."

(b) Fair Value Measurements

The fair value of financial assets and financial liabilities at amortized cost is determined in accordance with generally accepted pricing models based on discounted cash flow analysis or using prices from observable current market transactions. The fair value of the Group's cash and cash equivalents, receivables and accounts payable and accrued liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.

The fair value of financial instruments that are measured subsequent to initial recognition at their fair value, is measured within a 'fair value hierarchy' which has the following levels:

- (i) Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities
- (ii) Level 2: valuation techniques using inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- (iii) Level 3: valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company did not have any financial instruments that were measured at Level 2 or 3 valuation techniques.

13. FINANCIAL INSTRUMENT RISKS

The Group is exposed to various risks in relation to financial instruments. The main types of risk are credit risk, liquidity risk and market risk. These risks arise from the normal course of the Group's operations and all transactions undertaken are to support the Group's ability to continue as a going concern. The risks associated with financial instruments and the policies on mitigation of such risks are set out below. Management manages and monitors these exposures to ensure appropriate measures are implemented in a timely and effective manner.

(a) Credit Risk

The Group considers that its cash and cash equivalents and other receivables are exposed to credit risk, representing maximum exposure of \$519,773 (December 31, 2015 - \$794,839). Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Group's exposure to credit risk on its cash and cash equivalents is minimized by maintaining these assets with high-credit quality financial institutions. At March 31, 2016, the Group's cash and cash equivalents were invested in two financial institutions (December 31, 2015 – two financial institutions).

(b) Liquidity Risk

Liquidity risk is the risk that the Group will be unable to meet its financial obligations as they become due. The Group manages liquidity risk by ensuring that it has sufficient cash available to meet its obligations. These requirements are met through a combination of cash on hand, disposition of assets, accessing capital markets and loans.

At March 31, 2016, the Group's current liabilities consisted of trade and other payables of \$93,844 which are due primarily within three months from the period end. The Group's cash and cash equivalents of \$450,065 at March 31, 2016, were sufficient to pay for the current liabilities.

At December 31, 2015, the Group's current liabilities consisted of trade and other payables of \$38,612 which were due primarily within three months from the period end. The Group's cash and cash equivalents of \$794,605 at December 31, 2015, were sufficient to pay for the current liabilities.

13. FINANCIAL INSTRUMENT RISKS (continued)

(c) Market Risks

The significant market risk exposures to which the Group is exposed are interest rate risk, currency risk and price risk.

Interest Rate Risk

Interest rate risk is the risk that the future cash flows and fair values of the Group will fluctuate because of changes in market interest rates. Based on the Group's net exposure as at March 31, 2016 and December 31, 2015, and assuming that all other variables remained constant, a 1% increase or decrease in interest rates would result in an increase or decrease of approximately, \$4,500 and \$7,900 respectively, in the Group's interest income on an annual basis.

Currency Risk

The functional currency of the Company and its subsidiaries is the U.S. dollar. The carrying amounts of financial assets and financial liabilities denominated in currencies other than the U.S. dollar are subject to fluctuations in the underlying foreign currency exchange rates. Gains and losses on such items are included as a component of net loss for the period.

The Group is exposed to currency risks arising from fluctuations in foreign exchange rates primarily among the U.S. dollar and Canadian dollar and the degree of volatility of these rates. The Group has historically raised funds from equity financings primarily in U.S. dollars. Canadian G&A expenses are primarily paid in Canadian dollars. The Group does not use derivative instruments to reduce its exposure to foreign exchange and currency risks. The Group's exposure to foreign currency risks on cash balances held in foreign currencies is not expected to be significant.

Each of the tables below shows the impact that a 1% fluctuation in foreign currency rates compared to the U.S. dollar would have on the Group's consolidated loss, comprehensive loss and equity based upon the assets held at each date disclosed.

The foreign exchange risk exposure of the Group's cash and cash equivalents and accounts payable and accrued liabilities, as at March 31, 2016 is as follows:

Financial Instrument Type	U.S. Dollar	Currency	+/- 1% Fluctuation	
Cash and cash equivalents	\$ 131,302	CAD dollar	\$ 1,313	(1,313)
Accounts payable and accrued liabilities	(26,217)	CAD dollar	(262)	262
Total	\$ 105,085		\$ 1,051	(1,051)

The foreign exchange risk exposure of the Group's cash and cash equivalents and accounts payable and accrued liabilities, as at December 31, 2015 was as follows:

Financial Instrument Type	U.S. Dollar	Currency	+/- 1% Fluctuation	
Cash and cash equivalents	\$ 216,322	CAD dollar	\$ 2,163	(2,163)
Accounts payable and accrued liabilities	(1,760)	CAD dollar	(18)	18
Total	\$ 214,562		\$ 2,145	(2,145)

Other Price Risk

The Group did not hold any financial instruments that had direct exposure to other price risks at March 31, 2016 and December 31, 2015.

14. SEGMENTED DISCLOSURE

The Company is organized into business units based on the location of its mineral properties and has one reportable operating segment, being that of the acquisition, exploration and evaluation of mineral properties in Ecuador.
