Lumina Gold Commences Feasibility Study Fieldwork

Vancouver, British Columbia - Lumina Gold Corp. (TSXV: LUM) (OTCQB: LMGDF) (the “Company” or “Lumina”) is pleased to announce that it has recommenced drilling at its Cangrejos gold-copper project in southwest Ecuador. The Company has initiated the approximately 8,000 metre geotechnical drill program at both the Cangrejos and Gran Bestia deposits. The infill resource definition program will commence in September and will include approximately 10,000 metres of drilling. The goal of the program is to convert Probable mineral reserves to Proven mineral reserves for Phase 1 of mining at the Cangrejos deposit. Lumina intends to fund the Feasibility Study work and drilling from the proceeds received from Wheaton Precious Metals (see May 26, 2023 and May 16, 2023 news releases).

Lumina plans to ramp up to twelve drill rigs on site to complete the geotechnical and resource definition program, which it expects to complete in Q1 2024. Drilling will also produce fresh material for the next round of metallurgical test work to support the Feasibility Study.

About Lumina Gold

Lumina Gold Corp. (TSXV: LUM) is a Vancouver, Canada based precious and base metals exploration and development company focused on the Cangrejos Gold-Copper Project located in El Oro Province, southwest Ecuador. In 2023, the Company completed a Pre-Feasibility Study for Cangrejos, which is the largest primary gold deposit in Ecuador. Lumina has an experienced management team with a successful track record of advancing and monetizing exploration projects.

Cautionary Note Regarding Forward-Looking Information

Certain statements and information herein, including all statements that are not historical facts, contain forward-looking statements and forward-looking information within the meaning of applicable securities laws. Such forward-looking statements or information include but are not limited to statements or information with respect to future work programs, funding of future work programs and studies at Cangrejos. Often, but not always, forward-looking statements or information can be identified by the use of words such as “will” or “projected” or variations of those words or statements that certain actions, events or results “will”, “could”, “are proposed to”, “are planned to”, “are expected to” or “are anticipated to” be taken, occur or be achieved.

With respect to forward-looking statements and information contained herein, the Company has made numerous assumptions including among other things, assumptions about general business and economic conditions, the prices of gold and copper, and anticipated costs and expenditures. The foregoing list of assumptions is not exhaustive.

Although management of the Company believes that the assumptions made and the expectations represented by such statements or information are reasonable, there can be no assurance that a forward-looking statement or information herein will prove to be accurate. Forward-looking statements and information by their nature are based on assumptions and involve known and unknown risks, uncertainties and other factors which

may cause the Company's actual results, performance or achievements, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or information. These factors include, but are not limited to: risks associated with the business of the Company; business and economic conditions in the mining industry generally; the supply and demand for labour and other project inputs; changes in commodity prices; changes in interest and currency exchange rates; risks relating to inaccurate geological and engineering assumptions (including with respect to the tonnage, grade and recoverability of reserves and resources); risks relating to unanticipated operational difficulties (including failure of equipment or processes to operate in accordance with specifications or expectations, cost escalation, unavailability of materials and equipment, government action or delays in the receipt of government approvals, industrial disturbances or other job action, and unanticipated events related to health, safety and environmental matters); risks relating to adverse weather conditions; political risk and social unrest; changes in general economic conditions or conditions in the financial markets; and other risk factors as detailed from time to time in the Company's continuous disclosure documents filed with Canadian securities administrators. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws.
